

Advancing engineered materials. Together.

Ascend Differentiators

Unique ability to manipulate polymer chemistry

Global compounding expertise

Deep application engineering and industry expertise

Disruptive Innovation Spaces

E-mobility

Electrification

Connectivity

Solar

Packaging

Advanced Material Solutions

ThermaPlus

High-temperature, high-ductile PA66 technology; outperforms PA46

Durable, longer-lasting automotive applications

AVS, anti-vibration system technology

Quieter, more comfortable EVs

Flame-retardant polyamides

Safer electrification, smart homes and appliances

Long-chain polyamides

Sustainable solar farms

Copolymers for films

Stronger packaging
