

# Advancing sustainability. Together.

Our sustainability strategy is focused on meaningful, long-lasting improvements across three pillars

## Empowering People

Providing a safe and inclusive environment where people's careers can grow; Supporting our communities with hands-on assistance

- / Award-winning safety program
- / Robust career development at all levels
- / Culture and inclusion

## Innovating Solutions

Creating products and processes that enable sustainable technologies and lower lifetime impacts

- / Bio-based and recycled engineered materials portfolios
- / Design with sustainability in mind development program
- / Renewable energy-powered production

## Operating Without Compromise

Reducing the environmental footprint of our operations by reducing emissions, waste and water use

- / Goal to reduce GHG emissions by 80% by 2030
- / Waste and water reduction efforts
- / Efficiency and carbon utilization programs
